

# PROGRAM AND COLLEGE STRUCTURE CHANGES

Decisions about changes to academic programs were made with four factors in mind:

- Student demand
- Employer demand
- Demonstrated IUP strength in this area
- Potential for financial sustainability

Based on those factors, some programs and academic departments were

- Renamed
- Merged
- Placed into moratorium
- Closed
- Moved to a different college

In cases where academic requirements changed, students-in those programs prior to fall 2021 have the option to complete their degree according the old or new requirements.

# ARTS AND HUMANITIES

The College of Arts and Humanities brings together multiple aspects and areas of creative inquiry and practice.

Creativity of thought, of language, of design, of performance, of artmaking, of culture, of form, of expression, and of celebrating the diversity of our world, will come together to provide the groundwork for students to develop meaningful lives for themselves and for their communities.

The arts and the humanities are at the heart of what it is to be human. As such and with its programs, the college will help majors, minors, and students from across the campus develop ways of thinking, communicating, and knowing that will provide a lens and a pathway for the future.
